Objective

Motivated and adaptable professional with a Bachelor of Arts degree and proven experience across three reputable companies. Skilled in [like communication, coordination, client management, etc.], I am seeking a challenging position where I can leverage my diverse experience, contribute to organizational growth, and continue developing professionally

Experience

Welspun living ltd Vapi Gujarat

5/10/2015 - pursuing

Shift Officer

The role involves approving samples and giving necessary instructions to all departments before bulk production starts. It includes conducting internal inspections based on AQL 2.5 standards and coordinating poly bag packing, labeling, barcode placement, folding, and carton packing as per buyer requirements. Responsibilities also cover inspecting accessories like tags, threads, and labels, and managing online and final inspections with buyers and agents. The job requires handling customer complaints related to quality, preparing shipment samples according to buyer norms, and analyzing faults to segregate product shades. It also involves shade approval and physical shade matching, ensuring quality standards across all accounts, and managing stock segregation in different grades for quality compliance and buyer presentation.

Sara Textile ltd Nalagarh himachal pradesh

10/09/2010 - 25/02/2012

Shift Officer in Quality Department

The role involves inspecting accessories like labels, barcodes, stitching, tags, and poly bags.

It includes managing external inspections with buyers and agents, and coordinating stitching and embroidery work.

Responsibilities also cover approving samples, conducting fabric and yarn inspections, and ensuring quality per buyer protocols.

Additionally, it involves preparing detailed quality reports like GSM, inline, trolley, internal inspection, and GM reports.

Sel Manufacturing co. Ltd Rahon, Punjab

20/02/2012 - 30/09/2015

Shift Officer in Quality Department

The role includes approving samples, conducting internal inspections, and ensuring proper packaging as per buyer norms.

It involves coordinating with buyers/agents for inspections, checking accessories, and verifying packing standards.

Responsibilities also cover handling customer complaints, preparing shipment samples, and shade matching.

Quality is maintained by fault analysis, shade segregation, and systematic stock segregation for final delivery.
